Summary Statement

IAM Engineer with 2.5 years deploying enterprise identity solutions at CDW for Fortune 500 clients. Hands-on experience with Okta (Workflows, SSO/MFA, lifecycle management), Microsoft Entra ID, RBAC automation, and zero-trust architecture. M.S. in Information Assurance & Cyber Defense from an NCAE-C accredited program.

Education

MS **Marquette University**, Computer & Information Science — May 2025

- GPA: 3.8/4.0
- **Specialization:** Information Assurance & Cyber Defense (NCAE-C accredited)

BS **Marquette University**, Computer Science — May 2022

- **Minor:** Data Science

Experience

Identity & Access Management Engineer, CDW (Fortune 500) — Chicago, IL, June 2022 – Oct 2024

- Led IAM solution deployments for 15+ Fortune 500 enterprise clients across healthcare, finance, and manufacturing sectors
- Automated user provisioning and deprovisioning workflows using Okta Workflows, reducing manual administrative overhead by ~70%
- Designed and enforced RBAC policies for multiple client organizations, implementing least-privilege access and reducing over-privileged accounts by ~40%
- Integrated SSO/MFA across 100+ SaaS applications for Fortune 500 clients, improving security posture and reducing password-related helpdesk tickets by ~60%
- Maintained compliance with industry standards (HIPAA, SOC 2, PCI-DSS) through secure lifecycle and access governance processes

Product Engineer (Part-time), HIPAAChecker - Ubitrix / Marquette University — Mar 2025 – Dec 2025

- Conducted system testing and dashboard validation for HIPAA-compliance platform
- Assessed vulnerabilities across Android, Django, Laravel, and Rails apps
- Delivered product pitch for "dDream" at Marquette's Explorer Challenge 2.0

Teaching Assistant, GenCyber — Remote, Summer 2021

- Taught cybersecurity concepts including Kali Linux, Metasploit, and network mapping
- Facilitated hands-on activities for high school students

Skills

Identity & Access Management Platforms: Okta (Workflows, Universal Directory, SSO/MFA), Microsoft Entra ID, Active Directory

IAM Concepts & Frameworks: Zero Trust Architecture, Identity Governance & Administration (IGA), Privileged Access Management (PAM)

Authentication & Authorization: Single Sign-On (SSO), Multi-Factor Authentication (MFA), SAML, OAuth 2.0, OIDC, SCIM

IAM Operations: User Lifecycle Management (Joiner/Mover/Leaver), Automated Provisioning/Deprovisioning, Access Certification, Role Mining

Compliance & Security: HIPAA, SOC 2, PCI-DSS, Access Governance, Audit Logging, Least Privilege Enforcement

Programming & Scripting: Python, SQL, PowerShell, JavaScript, Java, R, Bash

Tools & Platforms: Git/GitHub, Linux/Kali, Windows, MacOS, FastAPI, React, SQLAlchemy

Projects

Adaptive Authentication Framework — Live Demo, GitHub

- Built a full-stack risk-based authentication system that scores login attempts across four signals (IP reputation, device trust, impossible travel, login time) and conditionally enforces MFA when the cumulative risk exceeds a configurable threshold
- Implemented the risk engine in Python/FastAPI, with each signal evaluated independently and scored additively against a threshold of 100
- Designed a device trust model where trust is earned through successful OTP verification, not assumed from prior sessions
- Deployed as a single-service application on Railway, with FastAPI serving the compiled React frontend and an interactive simulation panel for live demonstrations
- Stack: Python, FastAPI, SQLAlchemy, React, Tailwind CSS, Railway

JobTracker - Automated Job Application Scraper — GitHub

- Developed a Google Apps Script tool to automate job application tracking in Google Sheets
- Scrapes LinkedIn job postings to parse and populate metadata (Title, Company, Location, Salary)
- Implements error handling and conditional formatting to flag failed scrapes or listings requiring manual review
- Stack: Google Apps Script (JavaScript)

Certifications & Trainings

Okta Workflows Automation Training - CDW — 2023

OSCT Deep Learning Workshop - Marquette University — Mar 2025
